

## Chimerix Announces Pricing of Public Offering of Common Stock

January 21, 2021

DURHAM, N.C., Jan. 20, 2021 (GLOBE NEWSWIRE) -- Chimerix, Inc. (Nasdaq: CMRX), a biopharmaceutical company focused on accelerating the development of medicines to treat cancer and other serious diseases, announced today the pricing of its underwritten public offering of 11,765,000 shares of its common stock at a price to the public of \$8.50 per share. All of the shares to be sold in the offering are being sold by Chimerix. The gross proceeds to Chimerix from the offering, before deducting the underwriting discounts and commissions and other offering expenses, are expected to be \$100.0 million. In addition, Chimerix has granted the underwriters a 30-day option to purchase up to an additional 1,764,750 shares of common stock at the public offering price, less underwriting discounts and commissions. The offering is expected to close on or about January 25, 2021.

Chimerix intends to use the net proceeds from the proposed offering to fund the clinical development of its product candidates, commercial pre-launch activities and general corporate purposes.

Jefferies and Cowen are acting as joint bookrunning managers for the offering. H.C. Wainwright & Co. is acting as lead manager for the offering and JonesTrading is acting as co-manager for the offering.

The securities described above are being offered by Chimerix pursuant to a shelf registration statement previously filed and declared effective by the Securities and Exchange Commission (SEC) (File No. 333-244146). ### About Chimerix

Chimerix is a development-stage biopharmaceutical company dedicated to accelerating the advancement of innovative medicines that make a meaningful impact in the lives of patients living with cancer and other serious diseases. Our three most advanced clinical-stage development programs are, brincidofovir (BCV), ONC201 and dociparstat sodium (DSTAT). BCV is an antiviral drug candidate developed as a potential medical countermeasure for smallpox and is currently under review for regulatory approval in the United States. ONC201 is currently in a registrational clinical trial for recurrent H3 K27M-mutant glioma and a confirmatory response rate assessment is expected later this year. DSTAT is in development as a potential first-line therapy in acute myeloid leukemia and as a potential treatment for acute lung injury in COVID-19 patients.

### Forward-Looking Statements
